

Why don't I have any courses listed in BB? I checked with the registrar and I am enrolled in the course.

Enrollment in a course on Blackboard is not regulated by enrollment in a course through the registrar's office. The use of BB is a choice that each instructor makes, and it is not related to the college's registration system. If you are not seeing the course listed in "My Courses", you may need to enroll in the course in Blackboard as described in the "Login Help" page.
